

# FRANCES ANDREI E. ARIAR

Web Developer — React / TypeScript / AI-Integrated Web Applications

Surigao City | 09760237404 | [francesandrei.ariar@gmail.com](mailto:francesandrei.ariar@gmail.com) | [linkedin.com/in/andrei-ariar-7561163a0](https://linkedin.com/in/andrei-ariar-7561163a0) | [github.com/AndreiAriar](https://github.com/AndreiAriar) | [portfolio-lime-eight-77.vercel.app](https://portfolio-lime-eight-77.vercel.app)

## PROFESSIONAL SUMMARY

IT professional with hands-on experience building and launching real, working software for production environments — from scheduling systems to inventory tracking tools. Skilled in React, TypeScript, Tailwind CSS, and Firebase, with a focus on solving practical problems: making complex processes simple, connecting systems so they work together smoothly, and creating real-time tools that save time and reduce errors, including a clinic scheduling and queueing system that won the Best Thesis Award. Also growing my skills in AI-powered tools, learning how to integrate services like OpenAI and Anthropic Claude to build smarter, more helpful applications.

## TECHNICAL SKILLS

**Core Web Development:** React, TypeScript, JavaScript, Next.js, HTML, CSS, Tailwind CSS

**AI Integration:** Frontend integration patterns for AI services (OpenAI, Anthropic Claude, Google AI/Gemini), conversational UI design, and Retrieval-Augmented Generation (RAG) workflows

**Backend & APIs:** Node.js, Express, REST API design, GraphQL, serverless functions (Vercel API routes)

**Database & Auth:** Firebase Firestore, Firebase Realtime Database, Firebase Authentication, IndexedDB

**Build & Tooling:** Vite, ESLint, Git & GitHub, Vercel (CI/CD), npm

**Design & UX:** Responsive/mobile-first design, component-based architecture, accessibility (a11y) fundamentals, Figma, Chrome DevTools

## WORK EXPERIENCE

**IT Intern** — Concentrix, Cebu City

Jan 2026 – Mar 2026

- Completed a structured OJT program within an enterprise technology environment, gaining exposure to professional software workflows and cross-functional team communication.
- Supported internal operations and technical staff, assisting with day-to-day IT asset handling and support requests, and identified a gap in asset-tracking workflows that inspired a personal follow-up project (see IT Asset Inventory System below).

## PROJECTS

**CliniQueue — Clinic Scheduling & Queueing Platform**

Jan 2025 – Present

React, TypeScript, Tailwind CSS, Firebase | Live: [timefly-eyecare.vercel.app](https://timefly-eyecare.vercel.app)

- Built a web and mobile-based platform enabling clinics to manage patient appointments and real-time queues, reducing manual front-desk coordination.
- Designed a responsive, real-time interface supporting 3 distinct user roles (admin, staff, patient) with role-based dashboards and end-to-end appointment scheduling — live-updating, multi-user UX directly transferable to AI copilots and dashboards.
- Recognized with a Best Thesis Award for outstanding research and execution.

**IT Asset Inventory Management System**

Apr 2026 – Present

React, TypeScript, Tailwind CSS, Firebase | Live: [concentrix-it-inventory.vercel.app](https://concentrix-it-inventory.vercel.app)

- Built a web app to track IT assets (laptops, equipment) in and out of circulation, inspired by workflow gaps observed during the Concentrix internship.
- Implemented check-in/check-out logging and a real-time status dashboard, reducing manual tracking errors and improving data visibility for stakeholders.

## EDUCATION

**Bachelor of Science in Information Technology**

St. Paul University Surigao, Surigao del Norte

## AREAS OF FOCUS

AI-powered application development (OpenAI, Anthropic Claude, RAG workflows) · Next.js & server-side rendering · Data visualization (Recharts, Chart.js) · Open-source contribution · Accessibility (a11y) best practices · Cloud infrastructure (Vercel, Firebase, AWS)
